ABOUT ME

I am a driven Tech and Creative Enthusiast, currently serving as the Co-Founder & Design Lead of DNA Tech Community – Nexfellow’s No.1 community. I specialize in design leadership, content creation, and editing, and have successfully managed DNA’s entire social media presence, including high-impact posts and videos. I have organized major events such as DNA’s Web Development Workshop and actively contributed to Open Source Connect India. My journey includes participation in the Indian Blockchain Summit 2024, where I unofficially promoted Polygon’s innovative concepts, and collaborations with organizations like DetoxNow as a manager and Inspo, where my leadership qualities were officially recognized. A passionate fitness enthusiast and aspiring AI expert, I strive to merge creativity with technology – from building top-ranked communities and managing platforms to creating professional-grade thumbnails and digital content.
